# iD

(Redirected from [Id](#))

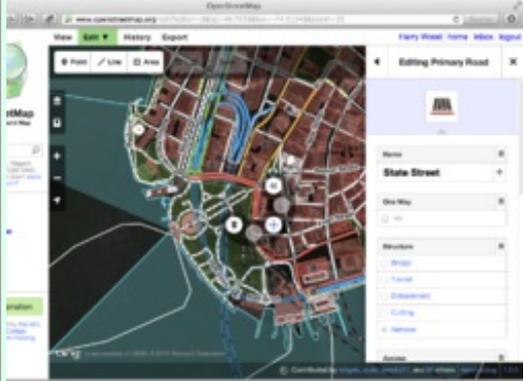

<b>Available languages</b>	<a href="#">Help</a>
<ul style="list-style-type: none"> <li>• <a href="#">català</a> • <a href="#">Deutsch</a> • <b>English</b> • <a href="#">español</a> • <a href="#">français</a> • <a href="#">magyar</a> • <a href="#">polski</a></li> <li>• <a href="#">português do Brasil</a> • <a href="#">русский</a> •</li> </ul>	
<b>Other languages — Help us translating this wiki</b>	<a href="#">show</a>

**iD** is an [OpenStreetMap](#) editor programmed in [JavaScript](#) (usable directly in the browser) with the aims to be *simple* and *friendly*.

**iD**

<b>Author:</b>	Many
<b>Website:</b>	<a href="http://ideditor.com">http://ideditor.com</a>
<b>Version:</b>	1.4.0 (2014-05-28)
<b>License:</b>	<a href="#">WTFPL</a>
<b>Platform:</b>	web-based (Javascript)

## Use it

You can use iD with your web browser live on [OpenStreetMap.org homepage](#). Simply zoom in on the area you are interested in, and click the "edit" button!

Note: In your user preferences you can set the "edit" button to launch different editors, in which case you can still find "iD" inside the "Edit ▼" menu drop-down. By default though, new users would simply click "edit".

Supported browsers: Firefox shows (at least for some users) bad performance ([a discussion](#); bugs: [1](#), [2](#), [3](#)). You may want to use another [browser](#) for running iD (a WebKit-based browser is recommended for best performance, currently).

Internet Explorer is not (yet) supported by iD (bugs: [IE9](#), [IE10](#), [IE11](#)).

To help you learn iD, there is a tutorial inside the editor (via a prompt on the start-up screen and always via the bookmark icon on the left side-panel). You also can browse [the collection of questions related to iD on help.osm.org](#). If your question has not been asked already, just add it. A list of keyboard [shortcuts](#) is available, too.

## Technical

iD uses [d3js](#) as a rendering layer and has a fast, modular core that manages OSM data. The primary mode of rendering is via SVG, though other renderers will be considered in the future.

- [Project introduction](#)
- [Code on github](#)

- [iD readme](#) (how to contribute, translate, install on a server, ...)
- [iD github wiki home page](#) (all [pages](#); technical and project infos)
- [Bug reports](#)
- A [development version](#) is also available if you want to test the latest code.  
You are still editing the live database if you authorize in the oauth dialog!

Initial development is by [Richard](#) and contributions are very warmly welcomed.  
Currently [User:Tmcw](#) and others are contributing.
