Επιλέγουμε το DokuWiki.
DokuWiki
DokuWiki is a simple to use and highly versatile Open Source wiki software that doesn't require a database. It is loved by users for its clean and readable syntax. The ease of maintenance, backup and integration makes it an administrator's favorite. Built in access controls and authentication connectors make DokuWiki especially useful in the enterprise context and the large number of plugins contributed by its vibrant community allow for a broad range of use cases beyond a traditional wiki.
Learn more
Community created
Does not receive automatic security updates
INSTANT APP NOT SCALABLE PHP
powering millions of websites and applications. It is built, used, and supported by an active and diverse community of people around the world. This quickstart will download and install the most recent stable version of Drupal and then generate a new site for you. Your administrative username and password will default to admin/openshift_changeme, so don't forget to alter them once you log in!

Βάζουμε ένα όνομα.
Public URL
http://
dokuwiki
-ioamaellak.rhcloud.com
OpenShift will automatically register this domain name for your application. You can add your own domain name later.
Source Code
https://github.com/openshift/dokuwiki-c
Branch/tag
Your application will start with an exact copy of the code and configuration provided in this Git repository. OpenShift may expect certain files to exist in certain directories, which may require you to update your repository after creation.
Gears
small
Gears are the application containers running your code. For most applications, the small gear size provides plenty of resources. You can also upgrade your plan to get access to more gear sizes.

require you to update your repository after creation.
Gears
small
Gears are the application containers running your code. For most applications, the small gear size provides plenty of resources. You can also upgrade your plan to get access to more gear sizes.
Cartridges
PHP 5.4
Applications are composed of cartridges - each of which exposes a service or capability to your code. All applications must have a web cartridge.
Scaling
No scaling
This application may require additional work to scale. Please see the application's documentation for more information.
OpenShift automatically routes web requests to your web gear. If you allow your application to scale, we'll set up a lo ars to handle traffic as you need it.
Πατάμε εδώ.
Region
No preference
aws-us-east-1
All gear sizes can be deplo the US Region.
aws-eu-west-1
WARNING: Small gears ca ot be deployed to this region. Only production gears can be deployed to the EU Region (small.highcpu, medium, and large).
Gears within your application will run on servers in the specified region.

DokuWiki release_stable_2014-05-05a deployed succesfully.
Login: admin
Password: SYFRIzU-niY_
NOTE: Don't forget to change your wiki admin password.
Αφού τελειώσει η διαδικασία, βλέπουμε τους κωδικούς.
Your application has been created. Continue to the application overview page.
Making code changes
Install the Git client for your operating system, and from your command line run
git clone ssh://5458b1cce0b8cdce2000010a@dokuwiki-ioamaellak.rhcloud.com/~/git/dokuwiki.git/
cd dokuwiki/
This will create a folder with the source code of your application. After making a change, add, commit, and push your changes.
git add .
git commit -m 'My changes'
git push
Manage your app
The console is convenient, but if you need deeper control try our other client tools
Command-Line
All of the capabilities of OpenShift are exposed through our command line tool, rhc. Follow these steps to install the client on Linux, Mac OS X, or Windows.
After installing the RHC read more on how to manage your application from the command line in our User Guide.

Wiki Upgrade
This plugin will automatically upgrade your wiki to the newest available DokuWiki version. Before continuing, you should read the Changelog to check if there are any additional steps for you to perform before or after upgrading.
To allow automatic upgrading, the PHP process requires write permissions for Dokuwiki files. The plugin will check for the necessary file permissions before starting the upgrade process.
This plugin will not upgrade any installed plugins or templates.
We recommend that you create a backup of your wiki before continuing.

Formatting Syntax

DokuWiki supports some simple markup language, which tri ble as possible. This page contains all possible syntax you may use k at the source of this page by pressing “Edit this page”. If you want to ge. The simpler markup is easily accessible via quickbuttons, too.

Επεξεργασία

Μπορούμε να δούμε διάφορες οδηγίες για την σύνταξη.

Basic Text Formatting

DokuWiki supports **bold**, *italic*, underlined and `monospaced` texts. Of course you can ***combine*** all these.

```
DokuWiki supports **bold**, //italic//, __underlined__ and ''monospaced'' te
Of course you can **__//''combine''//__** all these.
```

You can use subscript and superscript, too.

```
You can use <sub>subscript</sub> and <sup>superscript</sup>, too.
```

You can mark something as ~~deleted~~ as well.

```
You can mark something as <del>deleted</del> as well.
```

Paragraphs are created from blank lines. If you want to **force a newline** without a paragraph, you can use two backslashes followed by a whitespace or the end of line.

This is some text with some linebreaks
Note that the two backslashes are only recognized at the end of a line
or followed by

Πίνακας Περιεχομένων

video and be either a jpg or png file. In the example above a `video.jpg` file would work.

Επεξεργασία

Lists

Dokuwiki supports ordered and unordered lists. To create a list item, start the line with two spaces and use a `*` for unordered lists or a `-` for ordered ones.

Λίστες

- This is a list
- The second item
  - You may have different levels
- Another item

1. The same list but ordered
2. Another item
   a. Just use indention for deeper levels
3. That's it

```
  * This is a list
  * The second item
    * You may have different levels
  * Another item

  - The same list but ordered
  - Another item
    - Just use indention for deeper levels
  - That's it
```

Also take a look at the FAQ on list items.

Επεξεργασία

Text Conversions

DokuWiki can convert certain pre-defined characters or strings into images or other text or HTML.

The text to image conversion is mainly done for smileys. And the text to HTML conversion is used for typography replacements, but can be configured

> Yes!
>
> > Then lets do it!

Επεξεργασία

Tables

Πίνακες

DokuWiki supports a simple syntax to create tables.

Heading 1	Heading 2	Heading 3
Row 1 Col 1	Row 1 Col 2	Row 1 Col 3
Row 2 Col 1	some colspan (note the double pipe)	
Row 3 Col 1	Row 3 Col 2	Row 3 Col 3

Table rows have to start and end with a `|` for normal rows or a `^` for headers.

```
^ Heading 1      ^ Heading 2       ^ Heading 3          ^
| Row 1 Col 1    | Row 1 Col 2     | Row 1 Col 3        |
| Row 2 Col 1    | some colspan (note the double pipe) ||
| Row 3 Col 1    | Row 3 Col 2     | Row 3 Col 3        |
```

To connect cells horizontally, just make the next cell completely empty as shown above. Be sure to have always the same amount of cell separators!

Vertical tableheaders are possible, too.

	Heading 1	Heading 2
Heading 3	Row 1 Col 2	Row 1 Col 3
Heading 4	no colspan this time	
Heading 5	Row 2 Col 2	Row 2 Col 3

Applications
Settings
Support
Add-ons
1 Choose a type of application
2 Configure the application
3 Next steps
MySQL 5.5 database added. Please make note of these credentials:
Root User: adminsg1N7jQ
Root Password: byctdY2MS_Ye
Database Name: redmine
Connection URL: mysql://$OPENSHIFT_MYSQL_DB_HOST:$OPENSHIFT_MYSQL_DB_PORT/
You can manage your new MySQL database by also embedding phpmyadmin.
The phpmyadmin username and password will be the same as the MySQL credentials above.
Μας λέει τα password της βάσης.
Your application has been created. Continue to the application overview page.
Making code changes
Install the Git client for your operating system, and from your command line run
git clone ssh://5458bf90e0b8cd8ee4000185@redmine-ioamaellak.rhcloud.com/~/git/redmine.git/
cd redmine/
This will create a folder with the source code of your application. After making a change, add, commit, and push your changes.
Manage your app
The console is convenient, but if you need deeper control try our other client tools
Command-Line
All of the capabilities of OpenShift are exposed through our command line tool, rhc. Follow these steps to install the client on Linux, Mac OS X, or Windows.
After installing the RHC read more on how to manage your application from the command line in our User Guide.
